I wanted to take the time to let you know how my experience has been using the services of East Bay IT, Inc. I began working with East Bay IT, Inc. in July 2007 when I opened my law firm. Richard Panek was very knowledgeable and helpful in determining what kind of computer structure I needed for my small firm. He helped me develop a plan on my budget and his rates were very reasonable.

Fast forward four years and I am still using East Bay IT, Inc. My firm has grown and Richard Panek, along with his staff, is always looking out for my computer system needs. This year we added a new network server and additional workstations. I moved my office to a new location and the staff at East Bay IT, Inc. was very helpful and had my new system up and running in one day.

I am also working as a contract employee for the federal government. The documents I handle are highly sensitive and require a very secure backup system. I use East Bay IT, Inc.'s online backup with their encrypted security measures and I never have to worry about information being hacked.

It is a comfort to know that my information is secure and I can trust the people working on my computers. I highly recommend East Bay IT, Inc. to anyone who has one computer to hundreds.

Nicole Cameron
